Registered charity number: 1191069

FTWW

Fair Treatment for the Women of Wales

We are the foremost user-led charity in Wales focused on achieving health equity for women, girls, and people assigned female at birth (AFAB).

OUR VISION

The world we want to see

A Wales where everybody's right to health is respected and fulfilled, with everyone able to access support where and when they need it.

OUR MISSION

What we want to achieve

To bring people and organisations together with the voices of lived experience to eliminate health inequities in Wales for women, girls, and people AFAB.

OUR ROLE

We work with women, girls and people AFAB, public bodies and service providers to eliminate health inequities.

We do this through

INFORMATION

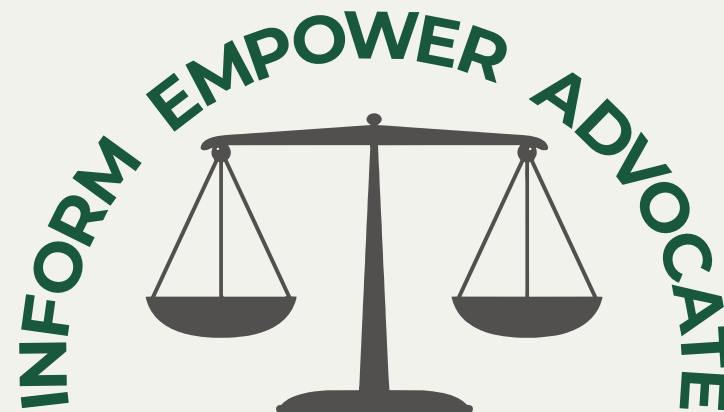

We ensure the people we support have access to the information they need to better understand, express, and manage the health issues affecting them and navigate the services they require.

EMPOWERMENT

We enable our members to gain confidence, be better equipped to overcome challenges in their lives, and play an active role in decisions about their health and wellbeing.

ADVOCACY

We create opportunities for individuals to speak from experience and contribute to the design and delivery of the research, policy and practice that impacts their health, wellbeing, and lives.

OUR STRATEGIC PRIORITIES

- 1** Challenge and support public bodies and organisations so that lived experience shapes the design and delivery of strategies and services that underpin women's health and wellbeing.
- 2** Implement mechanisms for members and volunteers to participate in activities that grow their skills and strengthen FTWW's capacity to influence.
- 3** Contribute to the evidence base on women's health through listening and acting on what our members say matters most.
- 4** Grow FTWW's visibility and clarity of message so that everyone understands our mission, our impact, and our focus on health inequity.
- 5** Ensure our sustainability so that we can grow capacity to achieve our goals and mission.
